

# Beyond Safety Training

## Embedding safety in professional skills

Corinne Bieder, Claude Gilbert, Benoît Journé, Hervé Laroche (Eds.)

Date: October, 2017

Series: SpringerBriefs in Safety Management

Series Editors: Kamaté, Caroline, Marsden, Eric, Daniellou, François

- Presents a critical overview of existing theories and practices about professionalization
- Questions the links between professionalism and safety
- Identifies levers for improvement to promote safety through professional development

### About this book

This book aims at understanding why, despite more and more resources devoted to safety training, expectations are not entirely met, particularly in the industrial sectors that have already achieved a high safety level. Its chapters not only reflect the most precious viewpoints of experts from different disciplines, different countries, with experiences in various industrial fields at the cutting edge of the theories and practices in terms of safety, professionalization and their relationships. It also gets the most out of the high-level discussions held among authors and consolidates the positioning of the Foncsi on the topic of professional development and safety. It highlights what is currently considered at stake in terms of safety training, in the industrial world (industry and other stakeholders such as control authorities), taking into account the system of constraints the different stakeholders are submitted to. It reports some success stories as well as elements which could explain the observed plateau in terms of outcome. It identifies some levers for evolution for at-risk industry and outlines a possible research agenda to go further with experimental solutions.

### Authors

- Claude Gilbert (CNRS, France)
- Silvia Guerardi (University of Trento, Italy)
- Pascal Ughetto (University of Paris-Est, France)
- Hervé Laroche (ESCP-Europe, France)
- Pierre-Arnaud Delattre (Value4Life, Australia)
- Rhona Flin (University of Aberdeen, Scotland)
- Petter Almklov (Sintef, Norway)
- Jan Hayes (RMIT University, Australia)
- Linda Bellamy (White Queen BV, The Netherlands)
- Jonathan Molyneux (ERM, UK)
- Benoît Journé (University of Nantes, France)
- Corinne Bieder (ENAC, France)
- Vincent Boccarda (University of Paris Sud, France)
- Paul Chadwick (UCL Centre for Behaviour Change, UK)
- Nicolas Herchin (ENGIE, France)
- Caroline Kamaté (FonCSI, France)
- François Daniellou (ICSI-FonCSI, France)

### About the series "SpringerBriefs in Safety Management"

As a series edited by FonCSI, the SpringerBriefs in Safety Management present cutting-edge research results on the management of technological risks and decision-making in high-stakes settings.

*The FonCSI, Foundation for an Industrial Safety Culture, is a public interest research foundation created in 2005, located in France. The FonCSI finances research projects concerning potentially hazardous industrial activities and their interaction with society, and aims to encourage open dialogue with all stakeholders (regulators, associations and NGOs, local government, researchers, industrial firms, trade unions, etc.). Our originality is the interdisciplinary nature of our activities, in France and internationally, as well as a strong commitment to innovation and to anticipating tomorrow's issues.
