

# Risk Communication for the Future Towards Smart Risk Governance and Safety Management

M. Bourrier, C. Bieder (Eds.)

Date: July 2018

Series: SpringerBriefs in Safety Management

Series Editors: Marsden, Eric, Kamaté, Caroline, Daniellou, François

- Questions the conventional "centralized views" of risk communication
- Discusses the challenges inherent to risk communication
- Proposes a novel perspective on risk communication as a way forward in risk governance and safety management

## About this book

The conventional approach to risk communication, based on a centralized and controlled model, has led to blatant failures in the management of recent safety related events. In parallel, several cases have proved that actors not thought of as risk governance or safety management contributors may play a positive role regarding safety. Building on these two observations and bridging the gap between risk communication and safety practices leads to a new, more societal perspective on risk communication, that allows for smart risk governance and safety management.

## Authors

- Mathilde Bourrier (University of Genova, Switzerland)
- Caroline Kamaté (FonCSI, France)
- Amandine Berger-Sabbatel (University of Nantes, France)
- Benoit Journé (University of Nantes, France)
- Geneviève Baumont (IRSN, France)
- Michael Baram (Boston University Law School, USA)
- Preben Hempel Lindøe (University of Stavanger, Norway)
- Mariko Nishizawa (Litera Japan Corporation, Japan)
- Loïs Bastide (University of Genova, Switzerland)
- Siri Wiig (University of Stavanger, Norway)
- Karina Aase (University of Stavanger, Norway)
- Olav Røise (Oslo University Hospital, Norway)
- Michel Guérard (Airbus, France)
- Petra Haferkorn (German Federal Financial Supervisory Authority, German)
- Corinne Bieder (ENAC, France)

## About the series "SpringerBriefs in Safety Management"

As a series edited by FonCSI, the SpringerBriefs in Safety Management present cutting-edge research results on the management of technological risks and decision-making in high-stakes settings.

*The FonCSI, Foundation for an Industrial Safety Culture, is a public interest research foundation created in 2005, located in France. The FonCSI finances research projects concerning potentially hazardous industrial activities and their interaction with society, and aims to encourage open dialogue with all stakeholders (regulators, associations and NGOs, local government, researchers, industrial firms, trade unions, etc.). Our originality is the interdisciplinary nature of our activities, in France and internationally, as well as a strong commitment to innovation and to anticipating tomorrow's issues.
